

BREXIT!

FISHING FOR
LEAVE
SAVE BRITAIN'S FISH

BOOM OR BETRAYAL FOR THE NEXT GENERATION OF BRITISH FISHERMEN?

Brexit automatically repatriates the 60% of fish EU boats catch from British waters

- Article 50 dissolves the disastrous EU Common Fisheries Policy (CFP) in March '19
- The UK reverts to international law, giving FULL sovereignty and control over all British waters
- The UK can regain all resources, worth £6-8 billion annually, and rejuvenate ailing coastal communities
- Giving freedom to create better environmental and economic policy, nurturing our greatest renewable resource for generations to come
- Only government and MPs can surrender Britain's coastal communities again.
